# Integration

The challenges of integrating people and space have never been greater.

Space is being reconfigured more frequently to optimise occupancy and reflect the changing requirement of organisations.

Simple, functional and very flexible, the Focus modular system makes it easy to shape a palette of different workspaces to support the wide ranging demands of individual and team work. Simple solutions ranging from benches and desks to table and panel set-ups all use the same kit of components and elements, to optimise personalisation, productivity and the use of space.

## Freestanding

Focus freestanding units enable the creation of workspace to support different management styles, whether open management for easy interaction with team members, to spaces that provide visual and acoustic privacy for confidential work. Focus enables the shaping and reshaping of space to meet changing needs.

Focus features a new approach to private office based in using integrated components to create unique workspaces that span the entire workplace.

The storage units are an integral element of Focus. Units can replace a structured leg and be positioned along the desk.

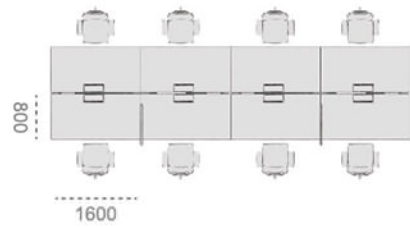

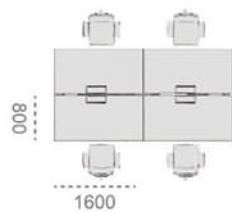

While Focus is suited to people working alongside colleagues, it can also be configured as a classic individual workstation, ideal for team manager. Focus' simple kit of parts makes elements such as an L-shape table easily adaptable for changing environmental needs.

# BENCH

As markets and technologies are always evolving, Focus is designed to answer your organization's ability of meeting the changing needs of individuals and teams. Focus provides the core infrastructure for shaping workspace, defining privacy and connection, and optimizing productivity. Integrated cable management solutions support plug and play at the worksurface.

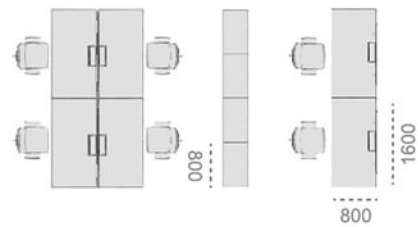

Focus systems enable the shaping of spaces with ideal balance between privacy for task work and visual connection for collaborative team work. A range of layouts, integrated cable management and worktools enable the designing of workstation for individual needs in the workplace.

As people working in small groups are delivering improved and tangible results, Focus is designed to create more collaborative spaces that encourage and facilitate this way of working. The ergonomic credentials of Focus will ensure user comfort while integrated cable management will help create tidy workplaces and support greater cabling capability. With the addition of screens, people can focus on their own work while adding more accessories to personalize their workspaces.

People need quick and easy access to storage that helps keep workstations free from office clutter and help them manage active work, anticipated projects and archived information. Focus has its own integrated storage that matching the design of the range.

# 120

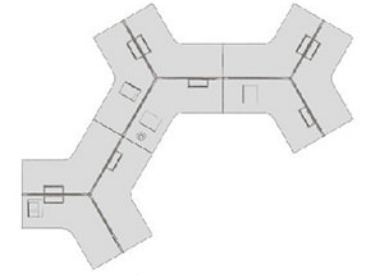

The wide selection of worksurface shapes and sizes of Focus enables the creation of diverse spaces to optimize support for individuals and teams, and the ways they work. The 120-degree workstation with screens provides visual privacy for intensive work while enabling easy connectivity for communication and collaboration within the workplace.
